

FURUTECH

PURE TRANSMISSION

High End Performance Neo Damper Outlet Cover

 NCF®

Special Prix

105-D NCF

Features: All non-magnetic *Damper* cover plate finished with NCF carbon fiber sheet and Neo Damper sheet plus NCF resin plate for the most effective damping

Neo Damper Outlet Cover 105-D NCF is Furutech's "Top of the line" Receptacle Cover. After a multitude of tests involving the best in damping materials, Furutech brings you its masterpiece. This combination of carbon and **NCF** and **Neo Damper** will be the final touch to your complete AC chain.

NCF - Nano Crystal² Formula - Nano Crystalline, Ceramic and Carbon Powder Incorporated into select Furutech products, Nano Crystal² Formula --- NCF is comprised of a special crystalline material that has two "active" properties. First, it generates negative ions that eliminate static and secondly, it converts thermal energy into far-infrared. Furutech then combines this remarkable crystalline material with nano-sized ceramic particles and carbon powder for their additional "Piezo Effect" damping properties. The resulting Nano Crystal² Formula is the ultimate electrical and mechanical damping material – only found in Furutech products! Nano Crystal² Formula eliminates static, "interconverts" thermal, mechanical and electrical energy and damps vibrations—all for the finest Furutech Pure Transmission signal imaginable.

Neo Damper – an extremely effective elastomer composite material created in Japan for vibration damping in sensitive electrical and mechanical devices such as high end audio products where transference or transmission of vibrational and electrical noise through power cables has detrimental effect of sound reproduction

New Improved Outlet Cover for GTX-D NCF / GTX-D / FPX series duplex receptacle designs
 Stainless Fixed Screw/Size M4 X 12mm (L)
 Cover /Size: 74X118.5 mm±0.2mm (t: 4.2mm ± 0.1mm)
